Heart Disease Almost Fatal to Young Girl

"My daughter, when thirteen years old, was stricken with heart trouble. She was so bad we had to place her bed near a window so she could get her breath. One doctor said, 'Poor child, she is likely to fall dead any time.' A friend told me Dr. Miles' Heart Remedy had cured her father, so I tried it, and she began to improve. She took a great many bottles, but she is spared to me today, a fat, rosy checked girl. No one can imagine the confidence I have in Dr. Miles' Heart Remedy." A. R. CANON, Worth, Mo.

The unbounded confidence Mr. Canon has in Dr. Miles' Heart Remedy is shared by thousands of others who know its value from experience. Many heart disorders yield to treatment, if the treatment is right. If you are bothered with short breath, fainting spells, swelling of feet or ankles, pains about the heart and shoulder blades, palpitation, weak and hungry spells, you should begin using Dr. Miles' Heart Remedy at once. Profit by the experience of others while you may.

Dr. Miles' Heart Remedy is sold and guaranteed by all druggists. MILES MEDICAL CO., Elkhart, Ind.

NEW SERUM PLANT WILL SUPPLY DEMAND.

University of Missouri Has New Plant For Manufacture of Hog Cholera Serum.

Soon after January 1 there will be put into operation by the veterinary department of the University of Missouri the most complete hog cholera serum plant in the country. This plant, which is costing \$50,000, will supply all the demands for serum from the farmers of the state. The site is 90 acres of land two miles north of Columbia. When running at full capacity the plant will handle 1,500 hogs all the time for the production of serum. About the same number is required for the production of virus to be used in hyperimmunizing the serum hogs. While the first class of hogs are not injured for food, those used to produce virus must be destroyed.

The plant consists of a hog barn, serum laboratory, virus laboratory, infection pen and tank room. The hog barn is used for housing hogs during the process of hyperimmunization. It has a capacity of 1,000 hogs. It is divided into pens, and has an exercise yard opposite each pen. In the building there are large provision rooms and two pens for washing and crating the hogs before they go to the laboratory. The barn has a granitoid floor, has good sewer connections and is well lighted and ventilated.

The serum laboratory is where the hyperimmunizing is done and where the serum is drawn and prepared. Hyperimmunization consists of first vaccinating with virus and serum, giving the disease and the preventive at the same time. Later another dose of virus is given and after another period a large final large dose. After this dose has had time to produce the maximum immunizing effect the blood is ready to be drawn and prepared for use. When the clot is taken out and preservative added to it, it is sent to the cold storage room until tested.

The manufacture of the virus is the expensive part of the process. A large number of hogs must be used and when a hog enters the infection pen his days are numbered. After the disease has reached the proper stage the hog is taken to the preparation room of the virus laboratory. This laboratory is a building entirely separated from the serum building. In the preparation room the hog is washed, shaved, and shrouded in cloths wet in antiseptic. In the stretching room all the blood is drawn from him and the carcass goes to the tank room. It is heated under pressure to kill the disease and is used for the production of fertilizer. The blood virus is prepared for use in hyperimmunizing just as serum is prepared. The plant will be working almost to its full capacity as soon as it opened. Dr. J. B. Gingery, assistant professor of veterinary medicine, says that the demand is so great now that 1,000 hogs would be needed to supply all. The present plant has only a small capacity.

UNEEDA MESSENGER SERVICE.

Therefore remember that we are in a position to render you this service for charges far less than concerns run by whites; and certainly with more promptness and correctness. Right in the very hub of the Negro district our swift messengers are ever ready, at the slightest thinking of the phone to make a "hurry up call or delivery in the quickest time on their fast wheels." There will be much of this work to do in the next three weeks; Christmas packages to be sent; messages carried and a thousand little things to be done by the messenger. Save yourself time and trouble and give our colored boys some work to do. Help Santa Claus by hiring our reliable messengers whom we back with a guarantee of reliability. Remember we charge the lowest price and phone calls are promptly answered.
